ABOUT ME

I'm a South African web developer passionate about modern web and WordPress solutions. With skills in React, Next.js, and clean design, I create user-friendly sites that serve people well. My Christian faith shapes my work ethic and commitment to excellence.

EXPERIENCE

Web Developer Intern | 2024/05 - Present

VIRTUAL REALITY SOUTH AFRICA

- Managed and optimized 24 WordPress websites, improving performance, SEO rankings, responsiveness, and load times across devices.
- Developed and maintained front-end features using HTML, CSS, and JavaScript, while implementing projects in React and Next.js.
- Created visual assets using Photoshop and Blender for web and internal VR content.
- Built full stack features with both front-end design and back-end logic, gaining real-world experience in modern development workflows.
- Assisted with cross-browser testing, debugging, and mobile optimization to ensure consistent user experience.
- Documented technical workflows and contributed to team communication, helping streamline development processes.
